

# Dosing systems

Kozegho is installed in an industrial building adapted to manufacturing process and equipped with cutting-edge technologies like Solidworks® and Autocad® 3D design workstations, CNC cutting mills, automatic and manual last generation welding machinery. With internal staff for design, built and test all electrical panels as PLC programming codes and our “real field” test station, adapted for all range of units minimize possible design or construction faults.

- Polyelectrolyte preparation systems
- Storage tanks up to 30 m<sup>3</sup>
- Dosing pumps skids
- Measuring and control
- Chemical preparation systems
- Mixers
- Chlorine dioxide generators

## Kozegho have a very dynamic and dedicated team with 20 years of experience

Kozegho have incorporate all necessary valences in production process, eliminating outsourcing errors and allowing us to adapt our knowledge of standard solutions, previously studied and tested, to the specifications and needs of each project.

Kozegho invest in a large stock of raw materials and components to reduce standard delivery times, provide a good response in case of urgent projects and avoiding shipping delays in case of failures under warranty or just spare parts deliveries.

## Kozegho develop a commercial concept beyond mere supplier

We intend building trust relationships, sharing know-how, responsibility and mutual experiences with our partners, in order to find the best “value for money” ratio in each project, from the end user point of view.
